Summary

I am Kasipat Shotikonvorakun, a Full-Stack Developer and Innovation Leader with 8+ years of expertise.

My technical proficiency includes mastery of Javascript, Nodejs, NextJS, React, and a quick adaptation to new technologies. With a robust skill set in DevOps, Kubernetes, and various programming languages.

In my career journey at Metro Systems, I've progressed from an API developer to leading impactful projects like B2B web ordering system. Currently, as a lead developer, I guide a team in executing JavaScript stack web projects and oversee a small AI research team.

Skills and Expertise

– **Languages**: Javascript, C#, Python, Java
– **Web Technologies**: React, NextJS, Nodejs, Tailwindcss, Ant Design, Prisma
– **Database**: Postgres
– **DevOps**: Jenkins, Kubernetes, Docker, Docker Compose, Nginx
– **Additional**: Ability to learn and adapt to new technologies quickly

Project Impact

– **A B2B web ordering system** for a Petroleum and Petrochemical Company.
– **A B2B web ordering system** for a Construction Material Company.
– **A web production planning system** for an Automotive Engine Manufacturing Company.

Work Experience
